Confirmation of economic benefits achieved using Envirox™ additive

Dear Mr.Torčík,

Further to testing carried out buses Karosa with engines LIAZ between May and August 2008, we hereby certify that a demonstrable saving of 7.59% on consumption was achieved in test.

The additive used was the nanotechnology product Envirox™ supplied by yourselves, in a dosing ratio of 1:4,000.

We wish you further commercial success with the additive Envirox™.

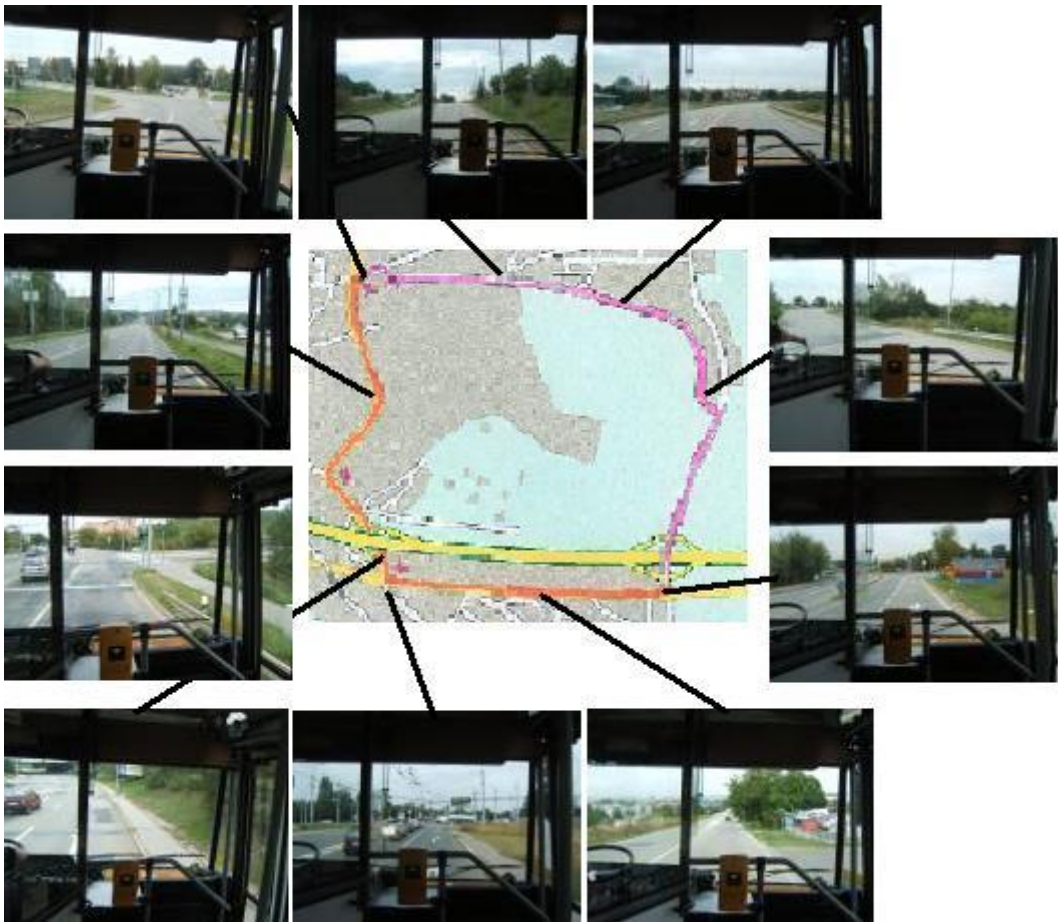

Yours faithfully,
