

To whom it may concern

This is to Certify that we have conducted a three month trial from October – December, 2009 of Diesel Additive “Envirox” (Eco-Neev), a product of Nanotech Solutions (a unit of Nandipl) on the excavators of West Bokaro Collieries. I am please to inform that the trial was very successful and following were the observations.

1. Relative fuel economy improvement on the excavators showed an improvement of 7.2% (approx.).
2. Huge improvement was also observed in particulate emission (67% reduction), carbon monooxide (50% reduction) and carbon di oxide (50% reduction).

Based on the above result Tata Steel West Bokaro Collieries is planning usage of said product on larger scale on its diesel opeatives HEMMs.
